harvesting nets – round

harvesting nets – rectangular

Dip nets

All harvesting nets have a sturdy stainless steel frame and a protection rod all round to protect against abrasion.

Two types can be supplied: Square landing nets with frames of 35 – 40 – 50 or 60 cm or round landing nets with bows of 40 – 50 or 60 cm. The nets are available with 5 – 10 – 15 or 20 mm mesh. The net depth of the round landing nets is 10 cm more than the diameter (Example: 50 cm net –

net depth 60 cm). Replacement nets are also available.

The yarn thickness is 0.6 mm (with 5 mm mesh size), 1.4 mm (with 10 and 15 mm mesh size) and 2.1 mm (with 20 mm). These nets are very rigid, and have been tested extensively by fish farmers.

NEW! breeding nets

Discharge screens

We have added stable breeding nets to our program. The frame is completely made of solid stainless steel. The breeding nets are available in two different sizes and with two different nets.

Fish farms need different screens in individual sizes.

We manufacture robust stainless steel screens in customised sizes with two types of holes: 3 mm round holes (50% through-flow) or 10 mm square holes (70% through-flow).

Breeding nets

Frame	mesh size	article no.
20 x 25 cm	1 x 1 mm	H400
20 x 25 cm	2 x 2 mm	H401
20 x 40 cm	1 x 1 mm	H405
20 x 40 cm	2 x 2 mm	H406

The screen surface is welded onto a stainless steel frame (square tube – either 20 x 20 mm or 30 x 30 mm).

When ordering, please indicate the desired screen size, the hole type, and the frame material. You can quickly and easily determine the price for your individual screen – refer to our price list.
